

## The Guess & Learn Board Game

Partner up with your kids for a uniquely South African board game that's filled with learning and fun.

# Guess & Learn SA Edition

## Components

36 guessing cards  
1 game board  
1 - 6 number cards  
4 play tokens

## How to play

Players are divided into teams, with a minimum of 2 per team. Total number of players in a team is optional. Each team places one token on the START square. First team to reach FINISH wins!

Shuffle and place all the guessing cards face down in the center of the board. Pick one number card. The number you selected determines how many cards you must pick up. (example: should a player draw #4 card, then four cards need to be picked up). Teams advance on the board correctly identifying the items that their team-mates are describing from the guessing cards. Set a time limit for this. We suggest 30 seconds, adjust time limit if you have very young children playing. Use a timer on your phone to set the time.

Only 1 member from each team will describe the card to their team-mates with each playing turn. No words from the card are allowed to describe the card to their team-mates and, only full proper answers are accepted.

Teams must strive to identify as many items as possible within each time frame. Move 1 space on the board for every correct answer. Once all cards have been used reshuffle the used cards and continue playing.

START

## Number Cards

These are meant to act as a dice but instead, cut them up and put them in a little container or bag where you can pick from every time it is your turn to play.
